

## A Closer Look at the NEW Devolutions Workspace

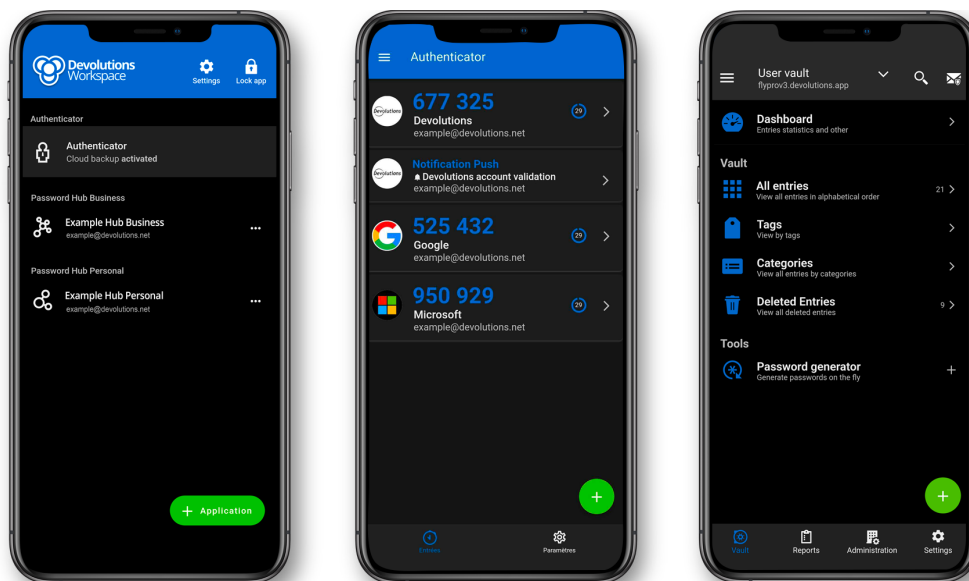

### **THIS IS GENERATING PLENTY OF BUZZ AND INTEREST**

In his [Devolutions 2022 Roadmap](#), David briefly highlighted an exciting new solution that we introduced this year: [Devolutions Workspace](#). This is generating plenty of buzz and interest, so let's take a closer look.

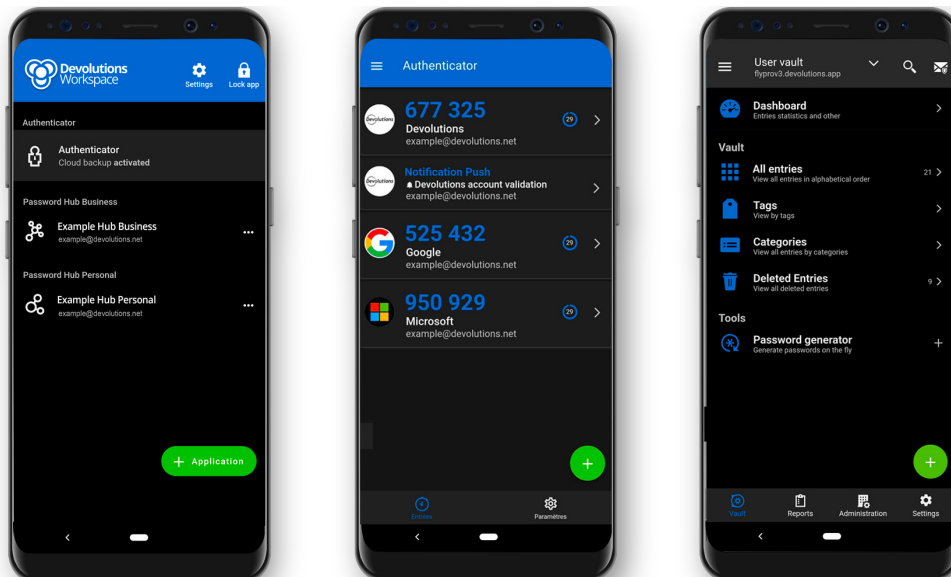

# What Is Devolutions Workspace?

Devolutions Workspace brings all of our mobile apps together into a single, centralized, cloud-based location. This makes mobile app access and management simpler and more efficient (similar to Office 365 and Google Workspace). Devolutions Workspace is available for [iOS](#) and [Android](#). Desktop apps for Windows and Mac will be released soon.

Let's take a look at the Devolutions Workspace iOS interface:

And let's take a look at the Devolutions Workspace Android interface:

## What You'll Find in Devolutions Workspace

---

Currently, there are three products in Devolutions Workspace:

- Devolutions Authenticator
- Password Hub Business
- Password Hub Personal

Please note: Devolutions Workspace will replace the mobile apps for Password Hub Business and Password Hub Personal. Users will still be able to access them, but ongoing updates will only be applied to Devolutions Workspace.

## Updates to Devolutions Workspace 2022.1

---

We just finished saying that Devolutions Workspace is a new solution, and yet this section will look at updates. How does that make sense? Well, here is the answer: At Devolutions, we are committed (OK – obsessed) with continuous improvement. And based on our internal evaluation, along with feedback from beta testers, we have already identified and made some key improvements to Devolutions Workspace, including:

- A re-designed interface that is more intuitive.
- It's now easier to sync entries with the cloud sync backup option.
- Users can now add Password Hub Business and multiple instances of Password Hub Personal at the same time.
- For enhanced security, we have added a biometric check on push notifications.
- We have added OTP support in autofill for Android users.
- We have implemented several fixes for Devolutions Authenticator & Password Hub.

## What's Next

---

The above-noted improvements are just the beginning! Here is what the Devolutions Workspace team is working on for the next update:

- Adding desktop apps for Windows & macOS.
- Adding support for Devolutions Server secure messages, checkouts, and other administration function.
- Adding an autofill dashboard for users to easily manage autofill entries (for example, improving security by preventing vault entries from being included in the autofill).

## Tell Us What You Think

---

Please share your experience with Devolutions Workspace. Tell us what you like, what you don't, and what you'd like us to add, remove, change, or fix. Devolutions Workspace is for YOU, and built to make your work easier, more efficient, and more secure. We also hope that it makes your job a bit more fun as well. Hey, it's tough being an IT pro these days ([just ask the Sysadminotaur gang](#)). You should be allowed to enjoy yourself a little, too!
