

## [COVID-19] Announcing Wayk Den including Unlimited Access with Wayk Now Enterprise - Free for 6 Months

---

**PRIVATE WAYK DEN DEPLOYMENTS  
WILL AUTOMATICALLY BE GRANTED  
AN UNLIMITED NUMBER OF WAYK  
NOW ENTERPRISE SUBSCRIPTIONS**

---

As businesses around the world adapt overnight to employees being compelled to work from home, IT departments may struggle to keep things running smoothly. Following the move made by [Cloudflare](#), Devolutions is announcing today that private Wayk Den deployments will automatically be granted an unlimited number of Wayk Now Enterprise subscriptions to connected clients, completely free, for the next 6 months.

## How Do I Benefit from This Offer?

To benefit from this offer, all you need to do is [deploy your own Wayk Den](#) server and connect Wayk Now to it. All connected Wayk Now instances will be granted Enterprise subscriptions until September 19th, 2020.

## I Am in a Rush — How Do I Get Started?

There are many deployment options, but the quickest way uses a [Cloudflare Argo Tunnel](#), which automatically handles the hardest parts:

- Exposing Wayk Den externally to the Internet
- Automatically validating TLS certificates

Even if you do not intend to use this service for the final deployment, we highly recommend following our step-by-step [Getting Started guide using a free Argo tunnel, with no registration required](#).

Alternatively, running Wayk Den inside an [Azure virtual machine](#) can be done relatively quickly.

## How Do I Get Help and Support?

We encourage users to [ask questions on our forum](#), which members of the Wayk development team will be monitoring closely. We can also do email follow-ups with Wayk Den users for feedback and assistance.
