

Devolutions Password Server: Email Notifications

YOU WILL IMMEDIATELY GET NOTIFIED BY EMAIL

Monitoring privileged accounts to ensure proper usage is critical. But manually keeping an eye on everything can be difficult — and exhausting. Fear not my friends, because Devolutions Password Server has a feature that you'll love (and that will allow you to rest your eyes a little bit!): Email Notifications.

About Email Notifications

With Email Notifications, if an activity is detected on a session, or a change is made to your security groups, roles, or users, you will immediately get notified by email from our DPS notification engine, and also some of our 2FA providers. For example, if a user adds a session anywhere in the data source or deletes a session from a folder, you'll know right away, and the email will tell you when the change happened and who did it. Without Email Notifications you might not stumble across this fact hours, days or weeks later.

Setting Up Email Notifications

Before getting started, you'll need to configure two settings in Devolutions Server: email settings and <u>scheduler</u> settings. Once that is done, here is the incredibly easy workflow:

1. Click on User Management.

2. Click on the **Email Notifications** side menu. In the top section, select the items and actions for which you want to be notified (add, edit or delete). In the bottom section, select the user(s) who'll receive the email notification.

3. Click OK and you're all set!

🎽 User Ma	nagement				
General	Email Notifications				
 Information Details 	Data source settings				
Address	Entries	Add	Edit	Delete	
Roles Privileges Security Groups Repositories Application Access Final Notifications	Opened Connections				
	Repository	Add	Edit	🗹 Delete	
	Roles	Add	Edit	🗹 Delete	
	Security groups	Add	Edit	Delete	
Settings	Tasks	Add	🗹 Edit	Delete	
	Users	Add	Edit	🗹 Delete	
	Users Locked Out				
	Email Notifications				
	Username		Enabled	Edit	Delete
	jessica.oxley@downhilpros.net				
	waiter@downhilpros.com _admin				

Notice Something?

You may have noticed on the screenshot above that 3 options won't let you select actions (add, edit or delete). Here is why:

- Data Source Settings: If enabled, you'll automatically be emailed any modifications to the data source settings.
- **Opened Connections**: If enabled, you'll automatically be emailed if a connection is opened.
- User Locked Out: If enabled, you'll automatically be emailed if a user is locked out.

I hope this feature will help you sleep like a baby, secure in the knowledge that DPS is here to help you keep an eye on your privileged accounts!

As always, please let us know your thoughts by using the comment feature of the blog. You can also visit our forums to get help and submit feature requests, you can find them <u>here</u>.
