

## [IMPORTANT ANNOUNCEMENT] Password Vault Manager Now Fully Integrated in Remote Desktop Manager

---

**WE EXIST TO SERVE YOU,  
AND TO HELP YOU  
CONTROL THE IT CHAOS  
IN YOUR  
ORGANIZATION!**

---

We are pleased to announce that Password Vault Manager (PVM) is now fully integrated in Remote Desktop Manager (RDM).

### **Why Did We Do This?**

Password Vault Manager has been around for many years helping non-technical users manage their passwords in a way that was similar to Remote Desktop Manager. However, Password Vault Manager was never designed to specifically address the needs of business users.

We have been working closely with our customers over the last year to better understand the specific needs of their business users, and this has resulted in the Devolutions Password Server web application, along with the Devolutions Web Login browser extension for credential injection and autofill in websites and applications.

Our CEO David Hervieux described the transition in this way: *“With Devolutions Password Hub, which is currently in preview mode and due to be released in the near future, we can offer a very robust and secure cloud-based password management platform that is far superior to Password Vault Manager – ideal for both technical and non-technical business users, and focused on team environments and sharing.”*

## Advice for Current Password Vault Manager Users

If you currently use Password Vault Manager in your organization, this is the perfect time to switch to Remote Desktop Manager, Devolutions Password Server, or Devolutions Password Hub. You will continue enjoying the same powerful password management tools and intuitive user experience, and you will gain many new features and integrations.

## Upgrade from PVM to RDM for Free

As you probably already know, all the features that are available in Password Vault Manager are also in Remote Desktop Manager. Basically, Remote Desktop Manager is the same software, but with more features! With PVM being phased out, we’ve decided to **replace your PVM with RDM for free!**

There are many reasons for upgrading. First, if you’re scared to change because you’re used to PVM UI, don’t be. There are many ways to customize your user interface to keep only what you want to use so it will still feel like PVM. Second, Remote Desktop Manager will always be supported and updated, which is hugely important! Finally, Remote Desktop Manager offers more features, and more is always better when it comes to layers of security!

Ready to get a hand on RDM Enterprise for free? To get your free license now, please contact our sales team at [sales@devolutions.net](mailto:sales@devolutions.net). If you’re still unsure what to do, remember that every Remote Desktop Manager license is perpetual, which means it never expires! Plus, every license comes with 1 year of maintenance!

## Special Limited Time Offer

If you’re a PVM user and do not want to switch to RDM, but you’d still like to upgrade to a solution that will be supported, we have some good news for you as well! For a limited time, we are offering Password Vault Manager users discounted pricing when they upgrade to [Devolutions Password Server](#) or Devolutions Password Hub. To learn more and get a quote, please contact our sales team at [sales@devolutions.net](mailto:sales@devolutions.net).

## **What If You Do Not Want to Switch?**

If you wish to continue using Password Vault Manager, then you are of course welcome to do so. However, please note that we will no longer be providing updates. This will allow us to more effectively focus our resources on supporting our active roster of products, while also introducing new solutions that will help our users around the world control the IT chaos.
