

## Introducing the New Web Client for Wayk Den

---

### **WAYK DEN IS A SELF-HOSTED CENTRALIZED SERVER FOR WAYK NOW ENTERPRISE**

---

Have you ever wanted to launch remote sessions directly from your browser? Well, now you can with the new web client for Wayk Den!

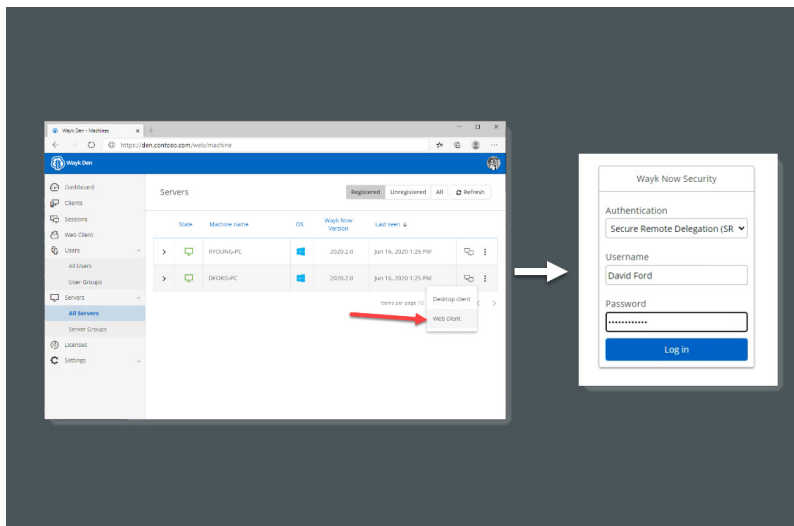

### **About Wayk Den**

[Wayk Den](#) is a self-hosted centralized server for [Wayk Now](#) Enterprise that can be hosted on-premises or in the cloud. It is used to access machines outside of a network, and to manage everything through an easy-to-use web-based dashboard. Wayk Den is ideal for IT Pros, SMBs, and Managed Service Providers.

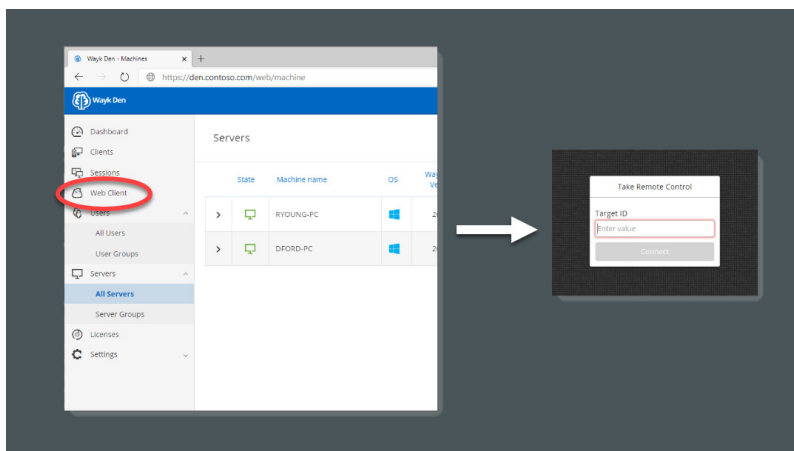

# How the Wayk Den Web Client Works

Using the new web client for Wayk Den is fast and easy. Here's what to do:

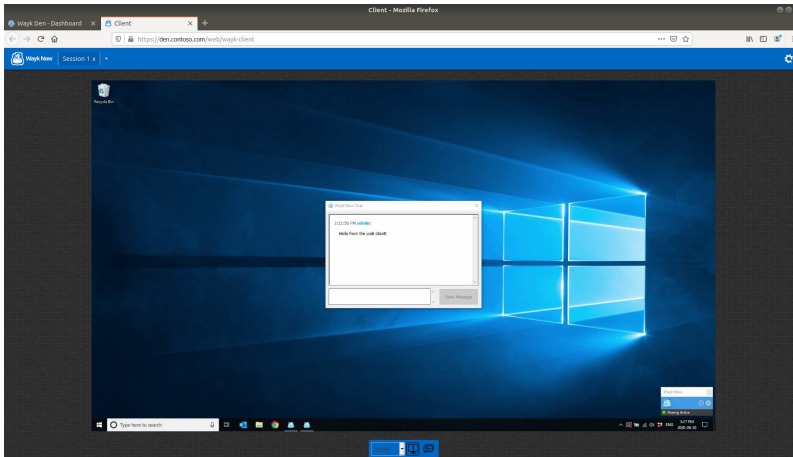

1. Launch Wayk Den
2. In the "Servers" or "Machines" menu, identify the remote machine you want to access.
3. Click the "connect" icon and then choose "web client".
4. Once your browser automatically loads, enter your username and password.

Alternatively, you can also click on the web client's icon in the left menu to access a native-like web version of Wayk Now via Wayk Den. As in Wayk Now's native version, simply type in a target ID and click on connect to access a remote machine.

And that's it! Within seconds, you'll be connected to the remote machine through your browser. When you've finished, simply logout.

## Try Wayk Den

Wayk Den is free and designed to work with Wayk Now Enterprise, which is available by subscription.

To help IT pros and SMBs during COVID-19, **all connected Wayk Now instances have been granted free Wayk Now Enterprise subscriptions until September 19th, 2020.** To take advantage of this offer and enjoy unlimited Wayk Den connections, you just need to [deploy your own Wayk Den](#) server and connect Wayk Now to it.
