

New Release: Devolutions Web Login 6 Has Arrived!

**WITH DEVOLUTIONS
WEB LOGIN 6,
LOGGING IN IS NOW
EASIER THAN EVER**

There are many ideas about how to save time and be more efficient. Some aren't that great, like [abbreviating all of your words and sentences](#). But others are quite helpful, like using [Remote Desktop Manager](#) to store your passwords, and adding both [Auto-Login](#) and [Devolutions Web Login](#).

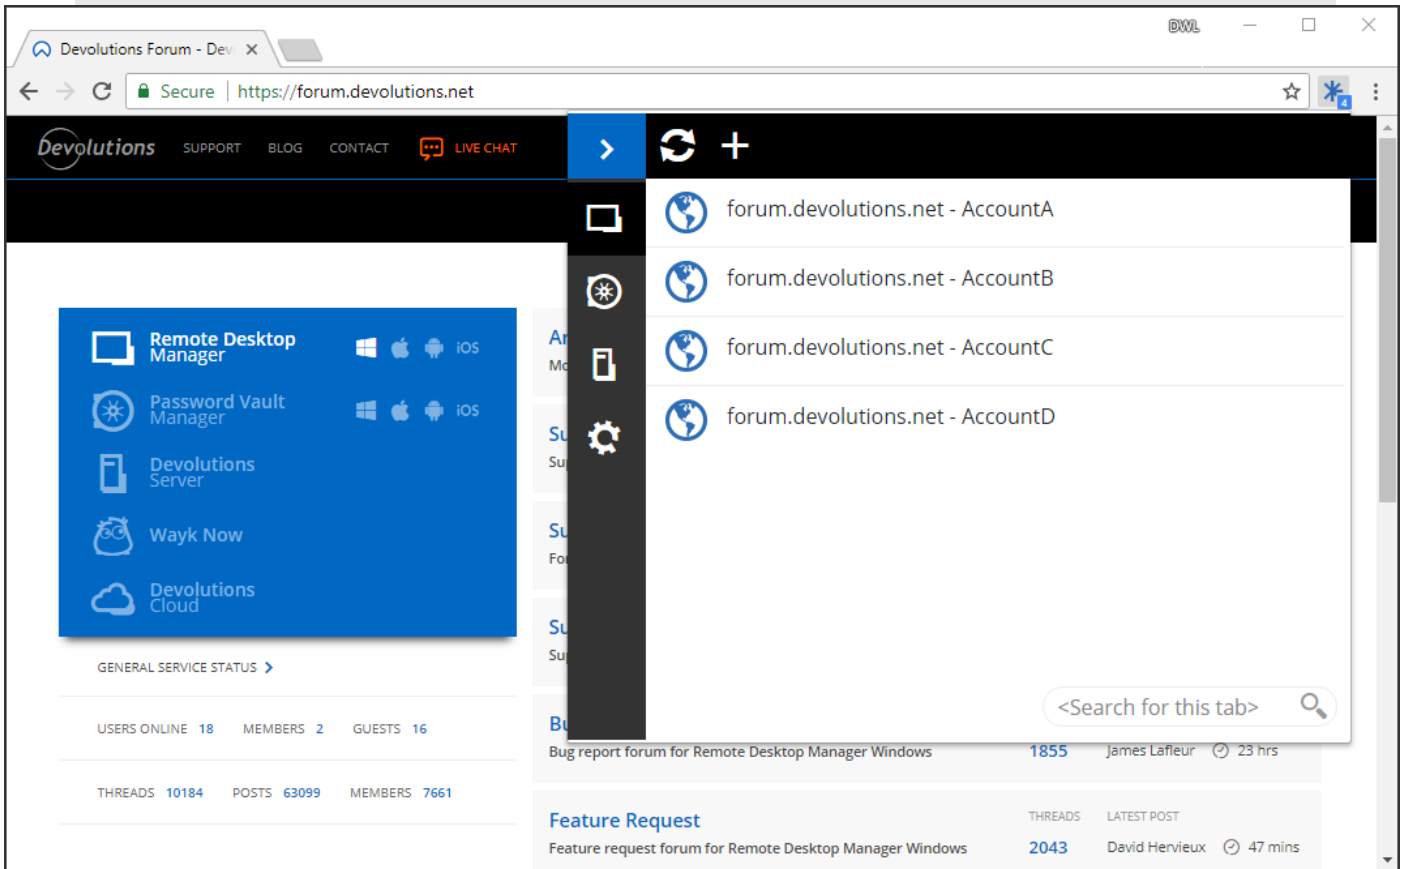

For those of you unfamiliar with Devolutions Web Login, it's our browser extension that not only helps you keep track of your passwords, but also automatically logs you into every website. And with Devolutions Web Login 6, logging in is now easier than ever. As Kevin from The Office might say: me think save time no enter password.

What's New in Devolutions Web Login 6

Devolutions Web Login 6 features many improvements. Here are my two favorites:

1. BEAUTIFUL NEW UI

Your life (and screen) is already complicated enough, which is why we've designed a crisp, clutter-free new UI:

2. CHOOSE WHERE TO STORE YOUR PASSWORDS

You can now choose whether to store the new credential in your private vault or the public vault. If you store your personal credentials in your private vault, you can easily keep them away from your coworkers' view.

Because let's not forget that Devolutions Server, our highly-secured vault for password management, offers [10 types of personal entries](#). You also have the option to select which app you want to save your credentials to: Remote Desktop Manager, Devolutions Server or Password Vault Manager.

The screenshot shows a web browser window displaying the Devolutions Forum website. A modal dialog titled "Save credentials" is open, prompting the user to select an app where they want to save their credentials. The dialog includes three options: Remote Desktop Manager (checked), Password Vault Manager (checked), and Devolutions Server (checked). Below the selection, there are input fields for Title, Username, Password, Folder, and Repository. At the bottom of the dialog, there are three buttons: "Never", "Save in My Vault", and "Save in Vault". The background shows the forum's navigation menu and a sidebar with service status information.

Also, if you wish to change your Devolutions Web Login client from [Remote Desktop Manager](#) to Devolutions Server, you'll find the steps for making the change [here](#).

DOWNLOAD IT NOW

Devolutions Web Login 6 is available for Firefox, Chrome and Opera — you can download it [here](#). We're working on versions for Edge and Safari. Stay tuned, they're coming soon.

SHARE YOUR FEEDBACK

Please share your feedback on Devolutions Web Login 6, including suggestions on what you'd like us to add in version 7. We're always listening!
