

[NEW RELEASE]

## Wayk Now 3.0 with Unattended Access Is Here!

### *Devolutions*

---

#### **SINCE THE EARLY DAYS, WAYK NOW HAS COME A LONG, LONG WAY**

---

It's hard to believe that two years have passed since we introduced Wayk Now. Back then, it was simply a local network instant remote support tool. And really, the only significant difference between Wayk Now and Windows RDP was that it worked better with Remote Desktop Manager because we controlled the code.

#### **Wayk Now Is All Grown Up!**

Since the early days, Wayk Now has come a long, long way. Today, it is used by individual IT pros and businesses around the world to troubleshoot issues, reduce implementation time, and increase security.

We've also made the standard version FREE for both personal and commercial use and introduced a licensed Enterprise version that offers more advanced and sophisticated features.

## The Journey Continues...

And now, I'm delighted to announce that after months of development and plenty of valuable feedback from our amazing community, [Wayk Now 3.0](#) is finally here!

There are MANY new features that you can look forward to across all versions ([Windows](#), [Mac](#), [Android](#), [iOS](#) and [Linux](#)). Here are some of the highlights:

- **NEW Unattended Access** (currently only available for Windows users)
- NEW Built-in Chat
- Improved LAN and Over the Internet Remote Support
- Improved File Transfer
- Improved Multi-Monitor Support
- Improved Clipboard Sharing
- Improved Multi-Concurrent Sessions
- Improved Remote Execution

## Get Wayk Now 3.0 Now

If you currently have an active **Wayk Now Enterprise license**, then you'll be prompted to upgrade the next time you log in.

If you're new to **Wayk Now**, you can request a free 30-day trial of the Enterprise version [here](#). After your trial, you can either [purchase a license](#) (multiple options are available based on your needs and budget), or downgrade to the [Free version](#) and continue using it for as long as you wish for personal or commercial use.

## Free vs. Enterprise — What's the Difference?

To help you quickly grasp the differences between Wayk Now Free and Wayk Now Enterprise, we've created a handy comparison grid. [Click here](#) to see it.

## Wayk Now vs. TeamViewer — What Should You Choose?

Many people have asked us how Wayk Now compares with TeamViewer. The first thing I'll say is that TeamViewer is a good product. In fact, I use it myself! However, it's only free for personal use — not for commercial use. This typically isn't an obstacle for large enterprises, but it can be a cost issue for individual IT pros and SMBs. Furthermore, even though our Wayk Now Enterprise version has a cost, it is very affordable.

Recently, my colleague Jenny did a feature-by-feature comparison of [Wayk Now vs TeamViewer](#). I invite you to check it out in order to better understand if Wayk Now is the ideal tool that delivers the best of both worlds: IT pros get the efficiency, security and control they need, while executives get the affordability and investment protection they need. Everyone wins.

## Tell Us What You Think

We're already focusing on the next update to Wayk Now (the update wheel never stops turning around here!), which means that we want you to tell us what you think. Share what you like, share what you don't, and share what you'd like us to add, change, remove, fix...anything! We take your feedback very seriously, and most of the improvements we make are a direct result of your suggestions. We're always listening!
