

New Version of Devolutions Password Hub (with a New Name!)

A NEW VERSION IS COMING

Today, I am happy to share two [Devolutions Password Hub](#) announcements. The first is that a **new version is coming and in a moment** I'll highlight some of its exciting new features. The second announcement is that **we're re-branding Devolutions Password Hub as Password Hub Business** to better reflect that it is designed for team and organizational use. The name change will be formally introduced when the next version is launched, which is very soon, so stay tuned!!!

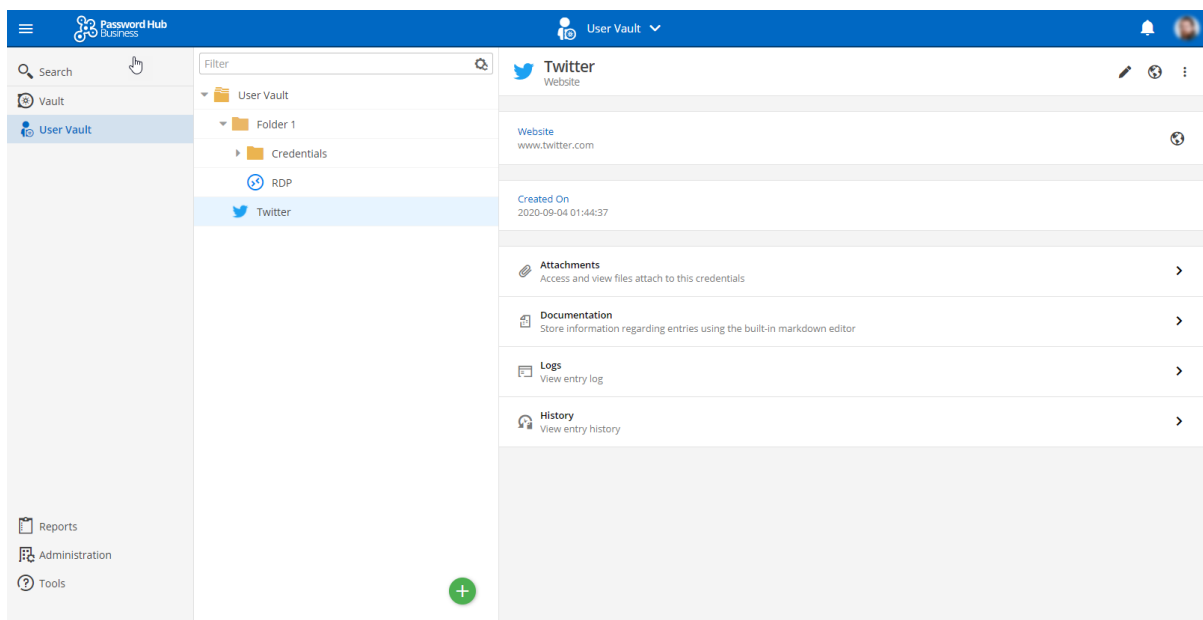

About Password Hub Business

In case you are not familiar with this product, Password Hub Business (formerly Devolutions Password Hub) is our **highly secure, flexible, and easy-to-use cloud-based password management solution for team environments**. It enables businesses to vault, manage and share business-user passwords and other sensitive data through a user-friendly web interface, which can be accessed via any browser. It is also [affordably priced for SMBs](#) that have limited budgets but need the same robust password management functionality and security as large enterprises.

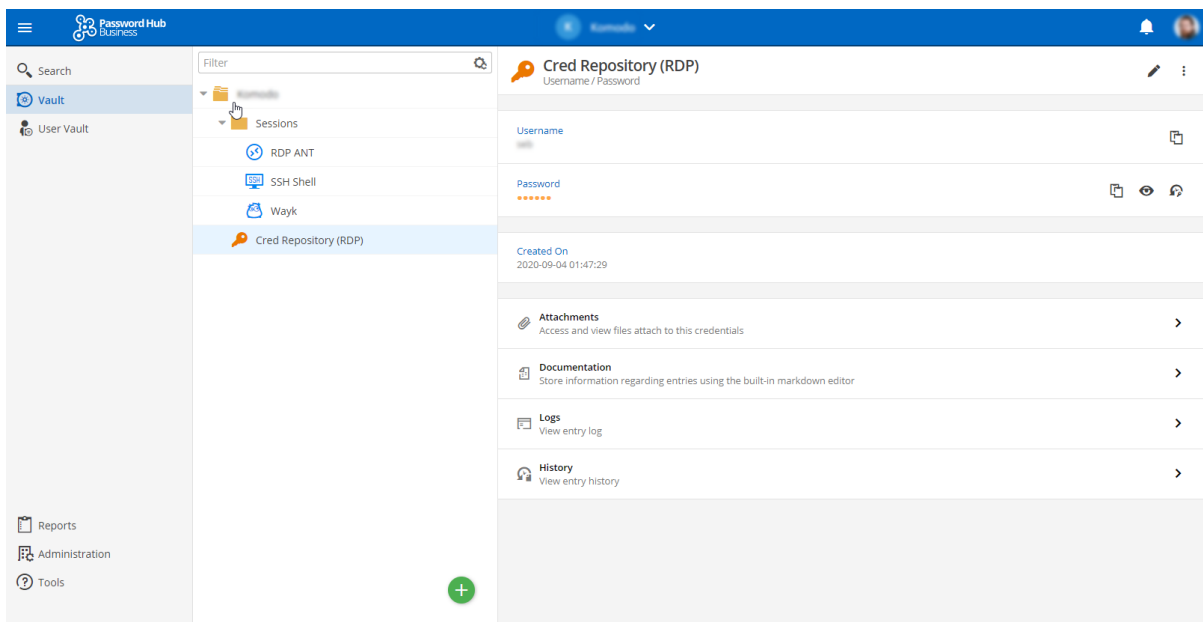

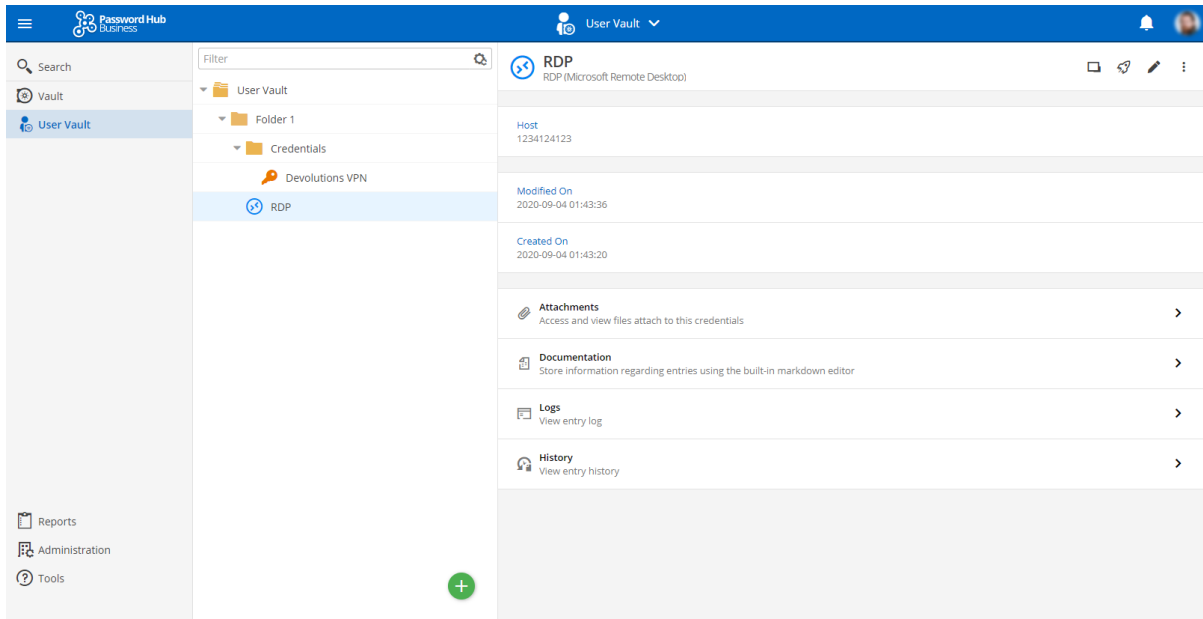

What's Ahead in Password Hub Business 2020.3.0

Password Hub Business 2020.3.0 will include many improvements that were suggested by our community. Some key new features you can look forward to include:

- **Password Hub Business can be added as a data source in [Remote Desktop Manager](#)** (many of you have asked for this!).
- **Folders can be created to organize entries.**

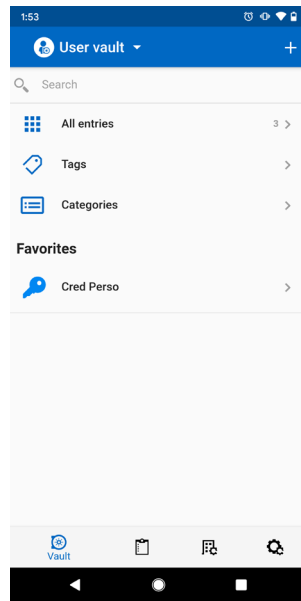

- **Security is verified through your [Devolutions Account](#)**, so you **no longer need a master key** to unlock your password vault.
- **Shared vault and user vault** (previously called private vault), both manageable by the admins. It gives admins **better tools to manage/view information and vaults in Password Hub Business**.

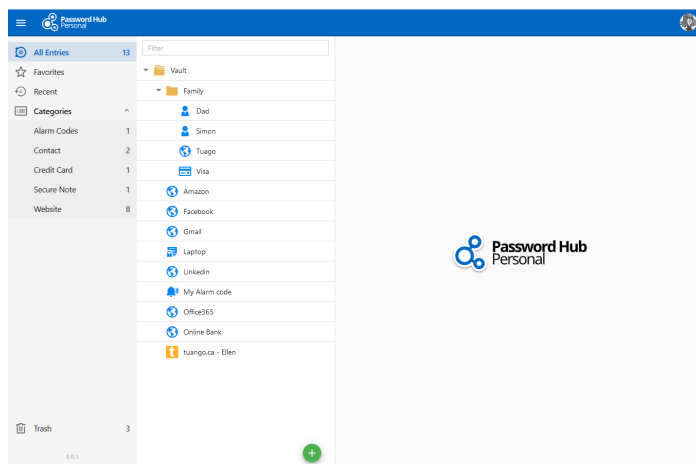

We have also made **several improvements to the mobile apps** for [iOS](#) and [Android](#) :

- **Autofill:** use the autofill feature to quickly access your logins
- You can now sort entries by **tag and categories**
- **Biometric lock and timer:** activate the biolock to lock and unlock your Hub using your fingerprint
- **UI is faster and easier**
- Entries can be **marked as favorites**

What's Coming?

We are currently working on new product, **Password Hub Personal**, a personal password manager, where **passwords and sensitive information will be stored securely**, which will **only be accessible by the user**. This vault will be your own, **as secure as Password Hub Business**, which will be **accessible through the Devolutions Account** and will offer the **same user experience as Hub Business**, completely **FREE** of charge! More information is coming very soon, **so stay tuned!**
