

## Remote Desktop Manager for Android: What's Coming Up

---

### WE'D LIKE TO THANK EVERYONE WHO HAS GIVEN IT A SPIN ON THEIR DEVICE!

---

Since launching **Remote Desktop Manager for Android** late last year, it's been downloaded tens of thousands of times by IT pros around the world. We'd like to thank everyone who has given it a spin on their device!

We've also received plenty of great feedback, and our great Android development team has been working hard to make **improvements and add new features**. Here's a look at what's coming up in the **next version, which will be released soon:**

### New Features

- Multi-tab sessions
- Full screen mode for sessions
- Sub connections (view and edit)
- Auto logoff when the application goes into the background
- Dashlane credential support
- Two-Factor Authentication for LastPass
- Clipboard of Android to RDP
- Session type : ILO and iDrac

### Download RDM for Android

If you have yet to experience RDM on your smartphone or tablet, **download it today, free from [Google Play](#)**.

### Send Us Your Feedback!

As noted above, we're ALWAYS listening to your feedback, and most of the improvements we make are based on suggestions and requests from our community. Please **let us know what you think** by posting in our Forum, commenting below, or sending me an email at [jdupont@devolutions.net](mailto:jdupont@devolutions.net) .

Cheers!
