

Remote Desktop Manager for iOS: What's Coming Up

**WE'D LIKE TO THANK EVERYONE
WHO HAS GIVEN IT A SPIN
ON THEIR DEVICE!**

Late last year we launched **Remote Desktop Manager for iOS**, and so far it's proven to be a big hit! We'd like to thank everyone who has downloaded it on their device, as well as those who have shared their feedback with us.

Speaking of feedback: as you'd expect, our talented iOS development team has been working very hard to make **improvements and add new features**. And so today, I'd like to give you a sneak peek of what's coming up in the next release, which is **coming out soon**:

New Features

- Multi-tab sessions
- Dashlane credential
- SSH agent forwarding
- RDP now support connection to a Hyper-V instance
- Shared clipboard

Key Improvements

- Changed cursor size in remote sessions
- Can now select a private key for SSH

Bug Fixes

- Fixed RD Gateway
- Fixed crashing when removing a favorite
- Fixed web browser forcing https usage
- Fixed infinite loading after going online
- Fixed crashing with variables
- Fixed private keys not working in SSH
- Fixed issues with user specific settings
- MariaDB/MySQL will now ask for password when 'save password' is unchecked

Download RDM for iOS

If you have yet to experience RDM on your iPhone or iPad, **download it today, free from the [App Store](#).**

Send Us Your Feedback!

As always, please let us know what you think by posting in our Forum, commenting below, or sending me an email at jdupont@devolutions.net.

Cheers!
