Wayk Now vs Bomgar

Last week, we compared Wayk Now vs. TeamViewer.
**Today, worthy remote desktop access tool Bomgar is putting
on the gloves, stepping into the ring, and getting set to
face off against Wayk Now.**

And so, without further delay: for those about to fight, we salute you!

WAYK NOW

ABOUT: Wayk Now is a flexible, easy-to-use and lightweight remote desktop access solution that reduces implementation time, increases security, enables scalability and boosts efficiency through a single, unique platform for all remote sessions. Wayk Now, which is fully integrated into our Remote Desktop Manager solution, delivers the best of both worlds for IT professionals and executives alike: efficiency, security and control on the one hand, and affordability and investment protection on the other.

COST: Wayk Now **Free** is free for both personal and commercial use. Wayk Now Enterprise delivers a more sophisticated feature set, offers a free 30-day trial, and can be purchased on a yearly subscription base. User, Site, Country and Global license options are available.

BOMGAR

ABOUT: Bomgar is a cloud-based or on-premise remote support solution, which allows support technicians to remotely connect to end-user systems through firewalls from their computer or mobile device. Bomgar also provides security and IT professionals with a platform to control, manage and secure remote access, which helps organizations improve tech support security, efficiency and overall performance.

COST: Bomgar offers a free 7-day trial, but after that users must purchase a Cloud, Term Appliance or Owned Appliance license. For Cloud and Term Appliance licenses, fees are billed annually. For the Owned Appliance license, there is a one-time fee.

Free for Commercial use	Free version available for commercial use.		X
RDM Integration	Launch the application directly from Remote Desktop Manager.		Fully Integrated
Price for Enterprise version	Price for the enterprise version based on a yearly subscription plan.	$$$	$

So there you go folks! You now have a clearer idea of the features that are supported by Wayk Now and TeamViewer. I'd also like to add that we're working hard on the next addition to the Wayk Now family, which is our on-premise edition Wayk Den. This will open the door to many new features. Stay tuned for updates.

Finally, as I mentioned earlier, I'll be doing the same head-to-head comparison of Wayk Now with both Bomgar and LogMeIn. If you'd like me to add any other tools to the list, send me a note and I'll see what I can do!

As always, please let us know your thoughts by using the comment feature of the blog. You can also visit our forums to get help and submit feature requests, you can find them here.
